COURSE BROCHURE & AGENDA PART I - SEPTEMBER 19 - 21

LIVE CONFERENCE: Westin Harbour Castle
Hotel, 1 Harbour Square, Toronto Lakefront, ON.,
M5J 1A6. **Hotel Block:** \$379CAD, rate expires
August 28th

EDUCATION EARLY BIRD RATE - SAVE

\$125CAD - Expires August 28

Education is open across borders

EDUCATION DETAILS & BHRT COURSE OVERVIEW - AN EVIDENCE BASED CME

No pre-requisite to attend. BHRT PART I is a Bioidentical Hormone training workshop (live conference style), involving a indepth scientific literature review of BHRT fundamentals, case presentations, and case management, an approach designed to help physicians & nurse practitioners successfully treat their patients, using the cutting edge knowledge they have obtained from the Worldlink Medical courses working with male & female patients of all ages, young or old in pre-menopause, menopause (women) or andropause (men).

Worldlink Medical teaches you beginning level concepts in PART I, such as the overall relationship of BHRT & the integration with your overall health. Tools and resources involving bioidentical hormone replacement therapy (BHRT) and the supportive results it gives with ailments & symptoms. This intense 2.5 day mini-residency teaches physicians & nurse practitioners everything you should know about hormones, the various types of hormones (both good and bad) the synthetic (non-human) vs. pharmaceutical bioidentical (human identical) vs. compounded (human identical but not FDA tested or approved). After an indepth literature review of the importance of optimizing hormones for men and women, will discuss guidelines for diagnosing, prescribing, monitoring and adjusting dosages, based on both patient symptomatology and blood lab tests when applicable are delineated.

Some of the hormones discussed and their associated benefits include the following: Testosterone for men & women, Estradiol, Progesterone, Desiccated Thyroid and T3/ T4 Thyroid, Melatonin, DHEA & Pregnenolone.

PART I is designed to provide the nuts and bolts needed to prescribe hormone replacement therapy, in addition to learning the fundamentals of BHRT, you will learn about the trouble shooting of HRT challenges through the medical literature presentations, case studies & open discussions requiring audience participation. Emphasis is placed on understanding the difference between normal and optimal levels of hormones based on the medical studies.

Day 1 - analyzes medical studies as they pertain to optimizing hormones for both men and women, why we do what we do, the benefits of HRT, and the literature support for optimization of hormone levels as opposed to simple replacement. Day 2 - involves extensive review of cases that involve laboratory evaluation, then diagnosing, prescribing, adjusting, trouble shooting, monitoring, and discussing hormone therapies for different scenarios for both men and women. We then review the various dosing regimens, side effects, precautions, complications, and tricks of the trade. Your practice of hormone replacement therapy will be based on peer-reviewed medical research and a wealth of clinical experience.

Many attendees frequently inquire why a patient is treated with various hormones when the baseline lab test indicates "normal." Just as confusing is the realization that the medical literature supports that normal is simply not optimal. A multitude of studies support optimization of all hormones regardless of the baseline levels, both for maintenance of quality of life and for future health benefits. In addition, the medical literature demonstrates that optimization of hormones results in relief of symptoms, improvement in well-being, and a decrease in morbidity and mortality by attaining levels in the upper range of normal. It is imperative that practitioners understand both the need and benefit of optimization, what levels are considered to be optimal, and have command of the literature that supports it.

One important aspect of this course is the extensive review of the medical literature that provides the credence and support as to why we optimize with certain hormones as well as avoid the use of non-isomolecular hormones. Remember that normal is definitely not optimal when it comes to hormone replacement, which applies to both men and women.

This is the most popular course taught on BHRT, designed to give you information and skills required to best prepare you to know everything you will need to know to start Monday morning. It will forever change your practice and the lives of your patients. The curriculum is an evidence-based program on preventive medicine designed to enhance all you need to know to start BHRT as well as business forms, consents, and HRT booklets to educate patients on the importance of hormone replacement.

Once you complete the **PART I: Discover the Power of BHRT Fundamentals**, we encourage you to start seeing patients and recommending BHRT & Thyroid to those patients who would benefit. The BHRT workshop covers each hormone in detail, that includes research, protocols, monitoring, adjusting dosage and case studies. Worldlink Medical provides Hormone Summary Recommendations and access to their private online forum via three different types of memberships & fees

The curriculum is an evidence-based program on preventive medicine designed to enhance your diagnostic and prescribing skills when optimizing hormones for both men and women. Most practitioners have not been trained to optimize hormone levels, if the baseline hormone level is normal.

Advisory:

The concepts and practice taught are evidence based (we follow the guidelines from the medical studies that prove efficacy) in contrast to what is taught by some groups whose approach is not evidence based (no justifiable scientific reason for what they are teaching and that which is often contrary to evidence based medicine).

COURSE OBJECTIVES

1. Evaluate and become proficient in the medical literature that supports biologically identical hormone replacement in contrast to chemically altered hormones and realize that "all hormones are not the same" as demonstrated per the literature.
2. Identify the uses of melatonin, DHEA and pregnenolone including correct dosing and monitoring.
3. Discuss the prescribing of testosterone for men and women including, methods for administration, complications, precautions and potential side effects of testosterone.
4. Evaluate new evidence that contradicts the experts conclusions from the HERS and WHI trials on estrogen treatment in women.
5. Compare and contrast the health benefits of estrogen and progesterone to the health detriments and harm of synthetic estrogen and progestin.
6. Describe the types, doses, and methods used to administer estrogen and progesterone in addition to how different formulations affect absorption, efficacy, side effects and complications.
7. Discuss recent literature, questions and answers that demonstrate the beneficial effects of hormones such as improved function, healing, and better quality of life.
8. Describe current concepts of thyroid replacement and compare and contrast different options available for thyroid replacement as supported in the medical literature and which lab tests are recommended.
9. Implement best clinical practices in diagnosing, prescribing, monitoring and adjusting of BHRT for improved function and patient symptomatology.
10. Recognize that it is the responsibility of the medical practitioner to assure that the compounding pharmacy they work with dispenses only high quality hormones from either a European, Canadian or USA made source in order to guarantee efficacy and therapeutic endpoints.
11. Identify that some compounded hormones are poor in quality, poorly absorbed, not micronized, and usually prescribed in very inadequate amounts to conform to scientific standards of maintaining therapeutic levels.
12. Analyze and review treatment protocols in case management for both simple and complex cases as it pertains to BHRT and when to use oral versus transdermal HRT.
13. Evaluate the lack of peer-reviewed studies for any compounding hormones in comparison to the standardized, pharmaceutical bioidentical hormones which are the only natural hormones utilized in medical studies.
14. Identify the biologic endpoints (lab tests) are the only reliable assessments to assure that the HRT prescribed is as efficacious as pharmaceutical bioidenticals utilized in the literature.

2025 ACCREDITATION STATEMENT

JOINTLY ACCREDITED PROVIDER™
INTERPROFESSIONAL CONTINUING EDUCATION

In support of improving patient care, this activity has been planned and implemented by The Foundation for Care Management (FCM) and TruBalance Healthcare Inc. FCM is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

This program is approved for *20 AMA Category 1 Credits™*

This program is approved for *20 Nursing contact and Pharmacologic hours* of education.

Healthcare provider should only claim credit commensurate with the extent of their participation in this activity

CE Credits:

20 Category A; Pharmacology

By the College of Naturopaths of Ontario (CONO)

PART I – DISCOVER THE POWER OF BHRT - EST TIME

FRIDAY

7:30 – 8:00 a.m. – Healthy breakfast onsite beside the conference room

NOTE: Dr. Rouzier breaks for 5 minutes at the top of every hour during the weekend for questions

8:00 a.m. - 12:00 p.m. - Introduction to Hormone Replacement Therapy

- Importance of optimization of all hormones as per the medical literature
- Health and quality of life benefits
- AMA statement on anti-aging
- The best preventive medicine to maintain well-being and reduce morbidity & mortality
- Normal is not optimal, and optimal is best
- Understand that simply replacing hormones to normal levels is not what is best for health and well-being
- Examples of optimal labs vs. normal labs, how to read labs properly
- HRT replacement: Have we been doing it incorrectly all this time?
- What we should know about hormones but were never taught
- Why we do what we do based on the medical literature

12:00 - 1:00 p.m. - Lunch onsite with Neal Rouzier, M.D. - Worldlink Medical & Donna Kingman, Trubalance Healthcare, Inc. Canada - "Keep an Open Mind & Ask Questions About Practice Setup in Canada "

1:00 p.m. - 3:00 p.m. - BHRT intro from the morning - continued

3:00 – 6:00 p.m. - Testosterone: Safe and necessary for both men and women

- Various types and doses but which is best, simplest, easiest
- Applications: How, where, when, to apply and why
- Complications, precautions, side effects and monitoring
- What levels are normal and what levels are optimal
- PSA, free PSA, and prostate cancer
- DHT, Estradiol, Finasteride, Anastrozole, 5 α -reductase inhibitors, & aromatase inhibitors
- A literature review, indications & contraindications, and blood clots?

Testosterone for women: The feel - good hormone for women too

- It is not just a male hormone but also a very important female hormone
- What types, doses and levels work best
- Application: How, where, when, why to apply
- Side effects and treatment, and use of Spironolactone
- Extensive literature review

6:00 p.m. - Day is complete !

SATURDAY

7:30 – 8:00 a.m. – Healthy breakfast onsite beside the conference room

NOTE: Dr. Rouzier breaks for 5 minutes at the top of every hour during the weekend for questions

8:00 a.m. – 12:00 p.m. - Progesterone: Just as important as estrogen

- Progesterone is absolutely necessary in ALL women at whatever age
- A literature review: There is not one negative study
- Protection against breast cancer, uterine cancer, heart disease
- MP ≠ MPA, natural vs. synthetic, safe vs. unsafe
- If some is good, more is better? Absolutely
- Dosing, monitoring, adjusting, and the importance of optimization
- Serum vs. saliva testing and what is the harm of inadequate dosing

Menopause: Estrogen & progesterone are absolutely necessary for health & well-being Estrogen is very complex to decipher and understand

- Natural vs. synthetic estrogen; risk vs. benefit – a literature review of types of estrogens
- Health benefits and feel-good benefits of HRT
- Don't fear it: The most recent consensus and timing is everything
- Informed consent for stopping HRT and harm of hormone deprivation
- What types of estrogen: How, what, where, and why?
- ACOG and NAMS: No study to show efficacy of BHRT – wrong!
- Doses, monitoring levels, adjusting, selection: What works best and when
- The importance of serum monitoring
- Transdermal vs. oral: Benefits and harm of each
- Does age make a difference? Does timing make a difference? Understanding MMP
- Indication and contraindications: Problems with synthetic vs. bioidentical vs. compounded
- New evidence that contradicts the conclusions of the WHI Trial and HERS
- Different strategies for managing PMS, peri-menopause, menopause, bleeding, problems, side effects and complications = no man's land

12:00 – 1:00 p.m. – Lunch onsite beside the conference room

1:00 – 6:00 p.m. - Thyroid: Why patients demand it and why physicians refuse to prescribe it

- The most misunderstood and ignored hormone
- Thyroid test is normal but symptoms persist. So now what?
- Types of hypothyroidism and which ones you miss
- Does your patient need their thyroid to be optimal? You bet!
- Understanding lab values
- What is responsible for low thyroid symptoms when TSH is normal?
- Types of thyroid hormones, dosing, monitoring, adjusting
- Treatment of fatigue: Treat the TSH or Free T3 or the patient?
- Endocrine viewpoint (labs) vs. patient perspective (symptoms)
- Signs and symptoms of sub-optimal thyroid replacement and treatment
- Literature support for optimization: Should you treat the labs or the patient?
- Improvement of health and well-being through optimization
- The consequences of low normal Free T3 as per JAMA

Summary & Review

- Interesting cases
- HRT indications, contra-indications, risks, benefits
- Side effects, problems, complications
- Dosing & adjustment of various types of HRT with lab reference comparisons
- Cautions, suggestions, things to do, and mistakes to avoid

6:00 p.m. – Day is complete!

SUNDAY

7:30 – 8:00 a.m. – Light breakfast onsite beside the conference room – Muffin's, coffee, tea, juice & fruit

8:00 a.m. – 12:00 p.m. - Question and Answer - Lab/ Case Study Review

Case Management: Why did you prescribe hormones if the levels were normal?

- Administration and appropriate dosing
- The nuts & bolts for practicing HRT correctly: Everything you should know
- Administration and appropriate dosing
- Monitoring the patient and adjustment for optimization
- Proper case management, problems and complications
- Mistakes to avoid
- Lab interpretation & lab comparisons
- Different optimal levels for different laboratories

Literature Review to Understand the Complexity of HRT

NEJM Meta-analysis on Testosterone/ Review of NAMS on BHRT

Melatonin, DHEA and Pregnenolone: All hormones provide health benefits including these -

- Melatonin: The great sleep and immune enhancer
- Treatment & prevention for cancer, HTN, migraines
- Administration & monitoring: How much is enough?
- DHEA: How DHEA improves health and longevity
- DHEA: How to prescribe, monitor, and adjust for maximum benefit
- A literature review supporting optimal levels
- Side effects and use of spironolactone
- Pregnenolone: The mother of all sex hormones
- Memory enhancer? And what about cancer?
- A literature review of these hormones
- Administration, monitoring and adjusting

12:00 p.m. - Day is complete!

HOW TO OBTAIN YOUR CME CREDITS

Please watch for your evaluation email from the Foundation for Care & Management right after the course is complete. Your evaluation will be done online

You must complete the evaluation after each course to obtain your CME credits & course certificate.

For all communication, contact:

Email - donna@trubalancehealthcare.com or CELL- 647-884-0663 (call or send text)

ABOUT THE INSTRUCTOR

NEAL ROUZIER, M.D

Is a pioneer in Bioidentical Hormone Replacement Therapy, practicing almost since its inception in the early 1990's. He has dedicated his life's work to uncovering the medical literature that supports safe and effective protocols for unique and personalized patient care. He is the Director of the Preventive Medicine Clinics of the Desert, specializing in the medical management of aging and preventive care for men and women. He has treated more than 3,000 patients with natural hormone replacement therapy and is recognized as a renowned leader and expert in the field. He has over 22 years of experience as an educator and practicing physician, and 29 years of Emergency Medicine experience at Queen of the Valley Hospital in West Covina, California.

Dr. Rouzier's latest book launch December 2024

"Normal Isn't Optimal - The Science of Bioidentical Hormones for Optimal Health & Wellness
(this book is not available in Canada yet)

WORLDLINK MEDICAL MEMBERSHIP

Claim the Exclusive Benefits of Membership

- Monthly CME Accredited webinar series
 - With full medical references - articles
 - Monthly Journal Club with online discussions
 - Access to EBSCO Host Online Library for full-text and abstract searches to thousands of medical journals
 - Article folders with access to abstract and full-text for all articles referenced in the four-part BHRT seminar series
 - Online patient education programs & provider listing
- Membership with Worldlink Medical grants you access to research and exclusive emerging content on hormone optimization, as well as access to the community trained in BHRT. Instant resource for abstracts and articles you need for research, interpretation, or sharing with colleagues and patients

CERTIFICATION

Certification through Worldlink Medical Academy provides licensed physicians, nurse practitioners and healthcare practitioners with the education, assessment and credence needed to practice hormone replacement therapy. The certification is designed to evaluate proficiency and competence in applying newly learned skills through written questions, case studies and demonstrations of how the skills apply in clinical settings.

TO OBTAIN THE ADVANCED BHRT CERTIFICATION

- Complete the 4 PART CME SERIES
- Submit your evaluation to FCM after each course
- Pay a one time certificate/ exam fee \$775US to Worldlink Medical & complete and pass the final exam

Certification information can be found at www.worldlinkmedical.com or www.trubalancehealthcare.com *

COURSE DESCRIPTION

Friday, September 19 to Sunday, September 21, 2025

Mastering the Protocols for Optimization of Hormone Replacement

PART I: Discover the Power of BHRT Fundamentals

COURSE SCHEDULE - Live Conference in Toronto - EST Time

Friday: 8:00am - 6:00pm

Saturday: 8:00am - 6:00pm

Sunday: 8:00am -12:00pm - Course is complete!

COURSE FEE'S (CANADIAN FUNDS)

EARLY BIRD DISCOUNT SAVE \$125 - EXPIRES AUGUST 28

INITIAL ENROLLMENT/ PRESCRIBER (NEW ATTENDEE): MD, DO, NP, ND: \$1825

PAST GRADUATE RETAKE: \$1299

NON - PRESCRIBER: ND, RN, PA, IMG, Dietician: \$1299

SUPPORT STAFF: \$1299

PLEASE NOTE: Price increase on the retake & support fee as of April 1, 2025. Starting with the PART I Sept 19 - 21 course in Toronto

COURSE INCLUDES:

- 1) *E - syllabus (digital files)*
- 2) *Medical references - covers all the hormones presented*
- 3) *CME credits*
- 4) *Breakfast & lunch onsite + snacks AM + PM*

FULL COURSE DETAILS:

www.trubalancehealthcare.com/education

PRINTED SYLLABUS: \$100 + HST (13%)

Pick up your binder, the first day of the course

HOTEL LOCATION & TRAVEL DETAILS

Westin Harbour Castle Hotel

1 Harbour Square, Toronto, ON., M5J 1A6

Located on the lakefront downtown

Hotel is across the bay from the Billy Bishop

Toronto City Island Airport for Porter Airlines

A quick 5 minute free ride on the ferry to the mainland

Hotel - Earn Marriot Bonvoy Reward Points

- **Room block rate:** \$379.00CAD + taxes per night
- **Hotel discount:** Expires August 28 or if the room block sells out first
- **Reservations:** Telephone: 1.888.627.8559
- **Airports:** Pearson International Airport or Porter Airlines

FOR ALL COMMUNICATION AND TO REGISTER PLEASE CONTACT:

Donna A.G. Kingman | Director of Business Development & Communications

Direct Telephone: 647.884.0663 (international cell - send text or call)
